ELSEVIER

Comput. Methods Appl. Mech. Engrg. 139 (1996) 433–435

Computer methods in applied mechanics and engineering

Subject Index of Volume 139

Boundary element methods
hp-Meshless cloud method, T.J. Liszka, C.A.M. Duarte and W.W. Tworzydlo 263–288
A stabilized finite point method for analysis of fluid mechanics problems, E. Oñate, S. Idelsohn, O.C. Zienkiewicz, R.L. Taylor and C. Sacco 315–346
Smoothed Particle Hydrodynamics, P.W. Randles and L.D. Libersky 375–408

Boundary layers
Application of Reproducing Kernel Particle Methods in electromagnetics, G.M. Hulbert 229–235

Dynamics
Smoothed Particle Hydrodynamics, P.W. Randles and L.D. Libersky 375–408

Electromagnetic fields
Application of Reproducing Kernel Particle Methods in electromagnetics, G.M. Hulbert 229–235

Finite element and matrix methods
Moving least-square reproducing kernel method Part II: Fourier analysis, S. Li and W.K. Liu 159–193
Reproducing Kernel Particle Methods for large deformation analysis of non-linear structures, J.-S. Chen, C. Pan, C.-T. Wu and W.K. Liu 195–227
An *h-p* adaptive method using clouds, C.A. Duarte and J.T. Oden 237–262
hp-Meshless cloud method, T.J. Liszka, C.A.M. Duarte and W.W. Tworzydlo 263–288
The partition of unity finite element method: Basic theory and applications, J.M. Melenk and I. Babuška 289–314
A stabilized finite point method for analysis of fluid mechanics problems, E. Oñate, S. Idelsohn, O.C. Zienkiewicz, R.L. Taylor and C. Sacco 315–346

Fluid mechanics
Reproducing Kernel Particle Methods for large deformation analysis of non-linear structures, J.-S. Chen, C. Pan, C.-T. Wu and W.K. Liu 195–227
A stabilized finite point method for analysis of fluid mechanics problems, E. Oñate, S. Idelsohn, O.C. Zienkiewicz, R.L. Taylor and C. Sacco 315–346
SPH for high velocity impact computations, G.R. Johnson, R.A. Stryk and S.R. Beissel 347–373
Smoothed Particle Hydrodynamics, P.W. Randles and L.D. Libersky 375–408

Fracture mechanics
Smoothed Particle Hydrodynamics, P.W. Randles and L.D. Libersky 375–408

General Rayleigh–Ritz and Galerkin techniques
Nodal integration of the element-free Galerkin method, S. Beissel and T. Belytschko 49– 74

Treatment of material discontinuity in the Element-Free Galerkin method, L.W. Cordes and B. Moran 75– 89
hp-Meshless cloud method, T.J. Liszka, C.A.M. Duarte and W.W. Tworzydlo 263–288

Multiple scaling
Generalized multiple scale reproducing kernel particle methods, W.K. Liu, Y. Chen, R.A. Uras and C.T. Chang 91–157

Nonlinear mechanics
Reproducing Kernel Particle Methods for large deformation analysis of non-linear structures, J.-S. Chen, C. Pan, C.-T. Wu and W.K. Liu 195–227

Numerical solution procedures
Meshless methods: An overview and recent developments, T. Belytschko, Y. Krongauz, D. Organ, M. Fleming and P. Krysl 3– 47
Nodal integration of the element-free Galerkin method, S. Beissel and T. Belytschko 49– 74
Moving least-square reproducing kernel method Part II: Fourier analysis, S. Li and W.K. Liu 159–193
Reproducing Kernel Particle Methods for large deformation analysis of non-linear structures, J.-S. Chen, C. Pan, C.-T. Wu and W.K. Liu 195–227
An *h-p* adaptive method using clouds, C.A. Duarte and J.T. Oden 237–262
SPH for high velocity impact computations, G.R. Johnson, R.A. Stryk and S.R. Beissel 347–373
Axisymmetric form of the material point method with applications to upsetting and Taylor impact problems, D. Sulsky and H.L. Schreyer 409–429

Solution of differential equations
The partition of unity finite element method: Basic theory and applications, J.M. Melenk and I. Babuška 289–314
A stabilized finite point method for analysis of fluid mechanics problems, E. Oñate, S. Idelsohn, O.C. Zienkiewicz, R.L. Taylor and C. Sacco 315–346

Solution of integral equations (singularity–method)
Nodal integration of the element-free Galerkin method, S. Beissel and T. Belytschko 49– 74
Treatment of material discontinuity in the Element-Free Galerkin method, L.W. Cordes and B. Moran 75– 89

Stability in fluid mechanics
Nodal integration of the element-free Galerkin method, S. Beissel and T. Belytschko 49– 74

Structural mechanics
Treatment of material discontinuity in the Element-Free Galerkin method, L.W. Cordes and B. Moran 75– 89
Axisymmetric form of the material point method with applications to upsetting and Taylor impact problems, D. Sulsky and H.L. Schreyer 409–429

Systems of linear and nonlinear simultaneous equations
Axisymmetric form of the material point method with applications to upsetting and Taylor impact problems, D. Sulsky and H.L. Schreyer 409–429
